Experience

Accenture - Consultant September 2021 - October 2025

Cloud Application Developer - New York City Employees Retirement System (NYCERS)

- Designed Java microservice solutions to transition legacy systems towards the cloud
- Executed IaaS and PaaS migration paths to improve scalability and cost efficiency
- Strengthened system security and resilience through architecture assurance and compliance enhancements
- Utilized Simflofy with JavaScript tasks to convert PDF records into XFDF and RDF data files

Pegasystems Support - Bank of America

- Implemented Generative AI to automate system recovery processes
- Diagnosed complex issues as second-level support resource
- Collaborated with engineers to discuss objectives and process resolution updates

Freshpire Inc - Data Migration December 2020 - January 2021

- Architected data infrastructure using Airtable workflows to create a centralized online platform for local farms
- Partnered directly with the founder to enhance visibility and efficiency across the agricultural supply chain

CliftonLarsonAllen LLP - Tax Accounting Internship December 2016 - April 2017

- Prepared 1040, 1120, and state property tax returns for individual clients and small businesses
- Collected and uploaded client financial documents to streamline data processing
- Met with clients to clarify tax documentation, explain deductions, and resolve filing-related inquiries

CPI Security - Inventory Internship May 2016 - September 2016

- Maintained weekly inventory records, reporting part usage and restock needs to ensure uninterrupted field operations
- Tested incoming components for defects to coordinate manufacturer returns, preserving product quality
- Distributed security system parts to service technicians based on daily schedules
